

DIVISION

LONG DIVISION LEVEL 1 (divided by 2)

LESSON 1 - C1006

ADVANCED

TS: _____

TF: _____

Name: _____ Date: _____

Direction: Find the quotient.

1) Steps:

- 1) divide
- 2) multiply
- 3) subtract
- 4) bring down
- 5) repeat

$$\begin{array}{r}
 \square \square \square \\
 6 \overline{) 792} \\
 \underline{- \square} \\
 \square \square \\
 \underline{- \square \square} \\
 \square \square \square \\
 \underline{- \square \square} \\
 \square \square
 \end{array}$$

2) Steps:

- 1) divide
- 2) multiply
- 3) subtract
- 4) bring down
- 5) repeat

$$\begin{array}{r}
 \square \square \square \\
 3 \overline{) 963} \\
 \underline{- \square} \\
 \square \square \\
 \underline{- \square} \\
 \square \square \square \\
 \underline{- \square \square} \\
 \square \square
 \end{array}$$

3) Steps:

- 1) divide
- 2) multiply
- 3) subtract
- 4) bring down
- 5) repeat

$$\begin{array}{r}
 \square \square \square \\
 4 \overline{) 948} \\
 \underline{- \square} \\
 \square \square \\
 \underline{- \square \square} \\
 \square \square \square \\
 \underline{- \square \square} \\
 \square \square
 \end{array}$$
